

# Working and Caring

A team of researchers recently asked women working in nine food retail businesses across Scotland about their experiences of combining paid work with looking after their children and/or other family members. The leaflet below explains what we found out from this study.

***A big 'thank you' to all of the women who took part in the research!***

**Please take  
a leaflet**

**We really enjoyed talking to you, and will use what you said to help businesses think more about how to support women who have caring responsibilities.**
